

# RECYCLING SAVES

# RESOURCES

All the things we buy are made from **natural resources**. Natural resources are collected from the environment - they may be chopped down by a chainsaw or dug up by an excavator.

Recycling reduces the amount of natural resources we need to collect, this helps to protect the homes of many animals and reduces pollution

Match the products below with the natural resource it is made from.

Newspaper and Cardboard	 Bauxite
Bottles and Jars	 Iron Ore
Steel Can	 Sand
Plastic Bottle	 Tree
Aluminium Can	 Oil
