

INDUSTRIAL WASTE BINS

Solo provide industrial waste bins and skips.

Trade waste bins in 1, 1.5, 2, 3 or 4.5 cubic metres

Bins are also available for garbage and cardboard.

How does the service work?

Solo can advise you on which size bin to select and how often to have it serviced. Once you choose a bin size and frequency of service, whether it be regular or 'on call,' Solo will deliver your bin to your premises or property.

The collection vehicle will visit on the days you have chosen to empty the bin. The waste is taken to an EPA (Environment Protection Agency) approved disposal site.

What can I put in the bin?

In the garbage bins you can load anything besides concrete, bricks or heavy materials. This is due to the truck's lifting limit. Lighter building materials, general household rubbish, green waste, office, workshop, retail store, warehouse and food outlet rubbish are all OK. Cardboard bins may contain cardboard and paper products.

What about wheels and lids?

Bins are available with wheels for moving to and from the collection location. Metal or lighter plastic lids are available. Locks are an option for increased security. Galvanised bins are available for areas close to the coastline.

How long can I have the bin for?

If you are doing a 'one off' clean up, we provide the bin for 2 weeks. (Mini Skips or Large Skips only) If you have the bin on an "on call" basis, you will be asked to pay a site fee. If you have a regular service booked in, you pay no site fee.

If you do have a regular service, you can also contact us for additional empties at random should you generate additional waste occasionally.
